Experienced Web Developer with a robust portfolio of designing and implementing cutting-edge web solutions. Proficient in PHP/Laravel and Vue.js, with a focus on creating dynamic attributes for database tables. Skilled in full-stack development, including e-commerce platforms and web applications. Collaborative team player with a focus on user needs and delivering intuitive user experiences. Demonstrated success in optimising website performance, enhancing security, and integrating third-party APIs.

### Education History

**BS Computing | University of Gloucestershire**  
Class of 2018

**Higher National Diploma (HND) | Gusto, Yangon**  
Class of 2016

### Languages

English - Fluent  
Myanmar (Burmese) - Fluent

### Key Skills

Laravel, Vuejs, Bootstrap, Git, jQuery, Node.js, CSS, MySQL, HTML & CSS, JavaScript, PHP

### Professional Experience

**Web Developer | Panacea-Soft, Myanmar**  
September 2022 to November 2023 (1 year, 2 months)

- Collaborated as a key developer in a dynamic team to create a comprehensive e-commerce application from scratch, utilizing PHP/Laravel and Vue.js.
- Engineered a cutting-edge system enabling customizable dynamic attributes for database tables, enhancing data flexibility and scalability. Executed intricate SQL queries to fortify the e-commerce backend architecture, ensuring exceptional performance and reliability. This resulted in a 50% boost in filtering and sorting efficiency, and a 30% decrease in developer intervention needs.
- Created and refined customized UX components, including highly adaptable data tables and modals, to improve usability within the admin panel. Optimised component performance to handle complex queries, contributing to an enhanced overall UX.
- Implemented a multi-auth system with Firebase API, including OAuth 2.0 authorization, connecting and syncing Firebase authentication with custom authentication in the backend. This added an extra security layer to the product and improved user experience by 50%.
- Successfully integrated many Third-party packages, such as an Image library Package (backend: Intervention Image, frontend: Dropzone.js), allowing users to customize their images on the platform in one go. This reduced the usage of other photo editing tools by 80%.

- *Designed the architecture of the consecutive version update process for the Web App, ensuring a flawless data migration process and feature integration for platform owner. This strategic approach facilitated smooth and efficient updates for the application, improving app stabilisation by 90% compared to previous manual update processes.*
- *Employed Agile tools such as Jira and Trello to track project progress, manage user stories, and facilitate communication within the development team. Maintained clear and up-to-date documentation to ensure transparency and accountability throughout the development lifecycle.*

---

### **Junior Web Developer | Visible One, Myanmar**

March 2022 to August 2022 (5 months)

- *Collaborated as a key developer in a dynamic team to create a comprehensive e-commerce application from scratch, utilizing PHP/Laravel and Vue.js.*
- *Collaborated with a team of three, under senior supervision, to ensure the successful execution of a robust encryption system, enhancing database security.*
- *Made significant contributions to the design and implementation of a secure authentication system for an e-library web app, leveraging Laravel's multi-auth mechanism to strengthen student and teacher accounts.*
- *Implemented advanced security measures, including encryption and secure password hashing, to establish a robust data protection framework.*

---

### **Freelance Developer**

September 2019 to December 2020 (1 year, 3 months)

- *Engaged proactively in meeting deadlines and ensuring client satisfaction through the successful execution of diverse freelance projects.*
- *Collaborated with cross-functional teams to contribute to the design, implementation, and testing phases of innovative Content Management System (CMS) solutions, delivering informative and user-friendly websites.*
- *Played a pivotal role in the development of confidential projects, including a Real Estate CMS Website and a Hotel Informative CMS Website, demonstrating dedication to secure and high-quality web development.*
- *Engineered a sophisticated Recording system for Vehicle Management, facilitating efficient recording and management of vehicle-related data such as maintenance schedules, fuel consumption, and service history. Anticipated a 50% improvement in client day-to-day record operations through this strategic integration.*
- *Designed and implemented a Vehicle Recording System Web App, showcasing expertise in web application development.*
